Starship Clinical Excellence Programme Website

The Clinical Excellence Programme embodies the Starship Child Health team's commitment to provide safe, quality, patient focused healthcare to children and families/whānau.

We want to understand what is going well, what happened when things didn't go according to plan, learn from both and improve the quality and safety of care.

Importantly we want to get better at how we share what we have learnt.

Further information and resources can be found on the Starship website -Clinical Excellence page
