

There's a little-known risk to small children

A COIN-SIZED LITHIUM BATTERY CAN GET STUCK IN A CHILD'S THROAT AND BURN THROUGH THE TISSUE IN JUST 2 HOURS, CAUSING SEVERE INJURY OR DEATH.

- **SEARCH** your home, and any place your child goes, for gadgets that may contain button batteries.
- **SECURE** button battery-controlled devices out of sight and reach of children and keep loose batteries locked away.
- **SHARE** this life-saving information with caregivers, friends, family and whanau.
- **GET HELP FAST:**
If a child swallows a button battery, go to the hospital emergency department right away.

The Battery  Controlled

Working together to help prevent injury.
