

Starship High Risk Rental Mattress Selection Guide

Over 25 KG: Mercury Advance Hybrid Mattress

The GUGD (Grade Up Grade Down) mattress provide a unique level of pressure care; rated as a 'very high risk' alternating air mattress, it also combines the properties of a quality foam mattress thus becoming hybrid mattress.

The patient can receive the full benefit of the alternating air therapy, or as they improve the air supply can be taken away leaving them with a comfortable supporting surface without having to exchange the mattress. This new technology mattress comes with many many benefits over traditional alternating air, improved patient comfort is the first!

Under 25KG: Coziny Plus Cot Mattress

The Coziny 300 is an alternating pressure cot mattress designed specifically for the prevention and treatment of pressure ulcers in infants and small children at High to Very High Risk of developing pressure ulcers. The Coziny 300 is an ideal solution to provide gentle pressure relief adapted to the light body weight. The mattress can be placed on top of a bed or cot mattress.

Featuring Intelligent Pressure Sensing Technology the Coziny 300 automatically adjusts internal mattress pressure in response to infants movements and position. A low pressure alarm system detects any abnormal drop in the systems internal pressure and notifies nursing staff through both audible and visual alarms.
