

Transcript: *school and diabetes*

“So Debra when Marcus goes to school, do you pack him some juice boxes in his lunch, or how does he treat a hypo if he’s at school or at sport”.

“Well at school he always takes a little lunch box aside from his lunch with some juice and some crackers and a piece of fruit or something just to be on the safe side, and at school they also have a box at the school where he’s got a pair of bloods and some short and long carbohydrates”.
